

Hein Htet Soe

Fullstack Developer · B.ICT, Rangsit University
heinhtetsoe1821@gmail.com · +66 81 880 5001 · hhs-portfolio.vercel.app · github.com/callmeHeinHtet

Recent ICT graduate shipping production web and mobile apps across the JavaScript and Python ecosystems. Internship at TBS Marketing building AI content pipelines and automation across a 2,000+ site SEO network. Track record of taking real-client products from schema design to live deploy.

EXPERIENCE

Software Engineering Intern — TBS Marketing Aug 2025 – Dec 2025
[Vue.js](#) · [Django](#) + [DRF](#) · [PostgreSQL](#) · [Redis](#) · [Celery](#) · [Docker](#) · [N8N](#)

- Built end-to-end **AI Article Generator** integrated into the CRM (titles → outline → content → AI images → auto-publish to WordPress), with Celery + Redis parallel pipelines generating content across 2,000+ sites simultaneously — replaced a manual workflow previously handled by the content team.
- Shipped **WordPress plugin auto-update system** covering 2,000+ live sites in TBS's Private Blog Network, eliminating manual rollouts across the entire fleet.
- Built **AI Ads Generator** and Freepik asset pipeline across Gemini, Flux, Qwen, and SeeDream — with in-app AI editing and upscaling.
- Integrated a **WordPress MCP server** for automated WordPress operations and exposed internal N8N workflows over secure tunneling (ngrok).
- Developed **User Activity Monitoring** across the TBS platform plus a real-time Task Manager UI over WebSockets.

SELECTED PROJECTS

Restroflow — Hotel Restaurant POS (Production, 2025)
[Next.js 16](#) · [React 19](#) · [Prisma](#) · [PostgreSQL](#) · [NextAuth](#) · [SSE](#) · [Vercel](#) · [Sentry](#)

- Multi-role POS (Admin / Manager / Waiter / Kitchen / KTV entertainment) deployed at a Myanmar hotel — Burmese menu, hourly KTV billing, charge-to-room folio, and idempotent Z-reports.
- Production-hardened money flow: `Decimal` arithmetic, audit logging on every sensitive mutation, Upstash rate limiting, constant-time PIN compare with brute-force lockout.
 - Cross-system folio integration with the hotel-management app (below) via shared API key and idempotent external-charges endpoint.

Aung Naing Thu Hotel Management (Real client, Production, 2025)
[Next.js 14](#) · [Prisma](#) · [PostgreSQL](#) · [NextAuth](#) · [Zustand](#) · [Vercel](#)

- Hotel management system for a real hotel client in Pyapon, Myanmar — public booking site plus an 11-view admin SPA.
- Reporting with PDF/CSV export, migration-safety guards, and the external-charges API consumed by Restroflow.

Splitr — AI Bill Splitter (Live, 2025) — splitr-omegahazel.vercel.app
[Next.js 16](#) + Gemini Vision. Mobile-first restaurant bill splitter that OCRs receipts and auto-assigns items across diners.

Stay — Brutalist Hotel Booking (Live, 2025)
Flutter + Firebase. Mobile-first booking app with real-time availability, membership system, and Firebase Auth.

EDUCATION

Bachelor of Information & Communication Technology — Rangsit University Graduated 2026
GPA 3.67

SKILLS

- Frontend:** TypeScript · React · Next.js (App Router + Pages) · Vue.js · Flutter/Dart · Tailwind
- Backend:** Node.js · Django + DRF · Prisma · NextAuth · REST APIs · WebSockets · Server-Sent Events
- Scaling & Infra:** Celery · Redis · Docker · N8N workflows · MCP servers
- Databases:** PostgreSQL (Neon) · MySQL · Firestore
- AI:** Gemini (Vision + text) · Flux · Qwen · SeeDream · LLM integration in production · multi-model pipelines
- DevOps:** Vercel · Firebase Hosting · GitHub Actions · Sentry · Upstash
- Design:** Figma · UI/UX wireframing

LANGUAGES

Burmese (native) · English (fluent) · Thai (beginner) · Chinese (HSK2)
